## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-67 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record teaches generating a pseudorandom test signal and a delay. However, regarding claims 1, 22, 41, 51 and 60, the prior art of record does not fairly teach or suggest in combination with all of the claimed limitations, the generating and recording for a plurality of delay times a corresponding plurality of signed correlation values having magnitudes indicative of the correlation between the signal and the respective delay. Therefore, the claimed invention is neither anticipated nor rendered obvious over the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Zacharov et al. (US Patent NO. 6,639,989 B1) discloses a method for loudness calibration of a multichannel sound system.

Art Unit: 2644

Clair, Jr. et al. (US Patent No. 5,668,884) discloses an enhanced concert audio system.

Stott et al. (US Patent No. 6,269,165 B1) discloses a method and apparatus for reduction of unwanted feedback.
